

African Utility Week and POWERGEN Africa

14-16 May 2019, CTICC, Cape Town

Addressing the current landscape of water and energy projects all over the subcontinent, African Utility Week and POWERGEN Africa in collaboration with the Department of Energy is proud to announce the confirmation of the South African Minister of Energy, Honourable Jeff Radebe, who will form part of the stellar line up at the opening address on 14 May at the CTICC.

The programme for 2019 follows the industry trend of connecting the full value chain, so content is not siloed by industry and reflects the many disciplines required for a modern, smart power industry.

In 2019 the exhibition has been enhanced by the addition of POWERGEN Africa in the generation space and is expanding into two new halls at the CTICC, enabling more floor space for dedicated sectors.
